

Questions

Easy: Mercury, mars

1. Q. What temperature does water boil at?
A. 100 degrees C
2. Q. What temperature does water freeze at?
A. 0
3. Q. What is the largest planet in the solar system?
A. Jupiter
4. Q. What is the smallest planet in the solar system?
Mercury
5. Q. How many planets are there?
A. 8
6. Q. What is the hottest planet?
A. Venus
7. Q. What is the coldest planet?
A. Neptune
8. Q. What type of animal is an owl?
A. Bird
9. Q. What type of animal is a frog?
A. Amphibian
10. Q. What type of animal is a dolphin?
A. Mammal
11. Q. What do you call the variable you change in an experiment?
A. Independent variable
12. Q. What do you call the variable that you measure in an experiment?
A. Dependent variable
13. Q. What do you call the variables that you keep the same in an experiment?
A. Control variables
14. Q. What is our galaxy called?
A. The Milky Way galaxy.
15. Q. Who was the first person to walk on the moon?
A. Neil Armstrong
16. Q. What is the name of the state change when a liquid turns into a solid?
A. Freezing
17. Q. What is the name of the state change when a solid turns into a liquid?
A. Melting
18. Q. What is the name of the state change when a liquid turns into a gas?
A. Evaporating
19. Q. What is the name of the state change when a gas turns into a liquid?

- A. Condensation
20. Q. What force attracts masses to planets/celestial bodies.
A. Gravity.
21. Q. What element of the periodic table allows humans and most animals to breathe?
A. Oxygen

Medium: Venus, Uranus, (Earth 1-10)

1. Q. What 2 elements water made up of.
A. Hydrogen and Oxygen
2. Q. What is the sun mostly made up of
A. Hydrogen
3. Q. What is the lightest element of the periodic table?
A. Hydrogen
4. Q. What is the closest star to Earth?
A. The sun
5. Q. Where is the smallest bone in our bodies?
A. In the ear
6. Q. What percentage of Earth's water is fresh (not salty)?
A. 3%
7. Q. What percentage of Earth's surface is water?
A. 71%
8. Q. Which planet has the tallest mountain?
A. Mars
9. Q. Which planet has the most moons?
A. Saturn
10. Q. How many planets in the Solar System have rings?
A. 4
11. Q. Name all of the gas planets?
A. Jupiter, Saturn, Uranus, Neptune
12. Q. What is the scientific name for gas planets?
A. Jovian planets
13. Q. Name all the rock planets?
A. Mercury, Venus, Earth, Mars
14. Q. What is the scientific name for rock planets?
A. Terrestrial planets
15. Q. What comet orbits the sun roughly every 76 years?
A. Halley's comet

Hard: Saturn, Neptune (Earth 1-10)

1. Q. What is the name of the tallest mountain in the solar system?
A. Olympus Mons
2. Q. How many moons does Saturn have?
A. 274
3. Q. How many moons does Jupiter have?
A. 95
4. Q. Which planet has the highest radiation?
A. Jupiter
5. Q. What planet has the highest UV
A. Mercury
6. Q. What is the 7th lightest element of the periodic table?
A. Nitrogen
7. Q. What do you call it when a gas turns into a solid?
A. Deposition
8. Q. What do you call it when a solid turns into a gas?
A. Sublimation
9. Q. How many astronauts have walked on the moon?
A. 12
10. Q. How many different nationalities have been to space?
A. 55
11. Q. How do you find out the density of something?
A. Divide the mass by the volume ($\rho = M/V$)
12. Q. What is the name of the smallest bone in the human body?
A. Stapes
13. Q. What percentage of our body is water?
A. 60%

Super hard: Jupiter

1. Q. What is the heaviest element of the periodic table?
A. Oganesson
2. Q. When do Earth's and Mars' orbit align?
A. 2 years and 2 months (26 months)
3. Q. How fast is the speed of light (km/s)?
A. Approx. 300,000
4. Q. What galaxy is closest to the Milky Way?
A. Andromeda
5. Q. How many galaxies are there?
A. Between 200 billion 2 trillion
6. Q. What was the era the dinosaurs lived in?
A. Mesozoic
7. Q. What is the largest comet ever discovered?
A. Bernardinelli-Bernstein
8. Q. How heavy is the human brain?

A. 1.3kg

9. Q. When did Newton publish his theory of universal gravitation?

A. 1687

10. When did Einstein publish his theory of general relativity?

A. 1915
