

The Leap of Space (Instructions)

1. Says the Leap of Space as a title with a space themed background.
2. Next it shows all the planets in the solar system (excluding Pluto) with a heading saying choose your planet.
3. Once you choose your planet it shows a screen with your planet being selected (zig-zag bright yellow circle).
4. Then it shows what this planet's gravity is and roughly where it is put in the solar system in the lowest to highest gravity. (E.g it is in the middle range). The background will be this planet's colour scheme.
5. After, it shows an astronaut standing on this planet with stars behind it.
6. Next, a random general knowledge science question is given with a small diagram below. The question will be as hard as the force of the gravity. (E.g if it has a really low gravity the question will be easier and if it has a high gravity the question will be harder)
7. After you have read it, you will tap on the screen so you can answer the question. You will either have to write the answer or be given multiple choice answers.
8. Once you have answered, 4 dots will appear in the centre of the screen like how things load.
9. If you get it correct, the word "correct" will appear on the screen in bold green letters and a tick in same colour and thickness will appear next to the words. After this your astronaut will jump up to the platform above it. This will happen infinite times from page 6 (when it asks you a question) (until you get a question wrong)
10. Else, you get it incorrect, the word "incorrect" will appear on this screen in bold red with a cross in the same thickness and colour will appear on the screen.
11. After this you see your astronaut fall down from the platform.
12. (Same as 5) Your astronaut is now standing on your planet with stars behind it.
13. Then the word "finish" will appear in zig-zag bright yellow circle (the circle will only be a semi-circle on the bottom of the word "finish", would be the black and white race finish pattern)
14. If a personal new record of amount of platforms you reached happens (for the planet) then the words "new record" appear on the screen with the zig-zag bright yellow circle around it.
15. Else/next, your name will appear on the leaderboard with the amount of platforms you've reached on it.
16. Finally there will be a continue button (so you can redo this planet) and a home button (so you can visit other planets)
